第二节（共5小题；每小题2分，共10分）

35. B 36. D 37. C 38. G 39. F

第三部分 书面表达（共两节，32分）

第一节（共4小题；第40、41题各2分，第42题3分，第43题5分，共12分）

40. It refers to the people you come into contact with daily, who you may not know well but can put a smile on your face.

41. They not only help the author feel a stronger sense of belonging to the community but also help with loneliness.

42. *Having consequential strangers is well worth celebrating as they are going to become your good friends.*

Having consequential strangers is well worth celebrating as they are a valuable part of your life, able to make you smile and feel a sense of connection.

43. **Possible version 1:**

The librarian at my community library is an important consequential stranger to me. He always greets me with a smile and extends appropriate care. I remember when I was having problems adjusting to high school life, he spotted it and encouraged me to embrace the new life bravely.

Possible version 2:

My consequential stranger is a friendly delivery person who always waves and asks about my day. His cheerful manner and genuine interest make me feel valued and connected to my neighborhood. His simple act of kindness brightens my day and reminds me that small interactions can make a difference.

第二节（20分）

Possible version 1: 一个方案（数字餐厅），两个理由（学生层面和学校层面）

Dear Jim,

I'm excited to hear about your interest in the Smart Campus Initiative at your school, and I'd like to share my advice.

You may consider proposing a digital smart canteen system which enables students to order

their desired dishes and select their pick-up time in advance.

This innovative method can help students save time during lunch, allowing them to collect their chosen meals at their convenience. Moreover, school kitchen staff can monitor food consumption accurately and adjust meal preparations based on actual orders so as to cut down on food waste.

I hope my suggestions can be of help to you.

Yours,

Li Hua

Possible version 2: 两个方案建议（智能学习工具和虚拟现实教学），分别有各自的理由

Dear Jim,

I'm thrilled to receive your letter and eager to share with you my ideas for a smart school plan.

Firstly, classrooms should be equipped with advanced digital tools, such as interactive smart boards, tablets for students and high-speed internet. These tools can support learning apps that tailor educational content to students' individual needs, which can significantly enhance study efficiency.

Moreover, incorporating virtual reality into the curriculum can transform the learning experience. Just imagine studying in a school where textbook concepts all comes to life! For example, when learning about gravity in physics, students can take a virtual spacewalk to experience the zero gravity firsthand. Isn't that thrilling?

What do you think of my suggestions? I hope they can inspire you and help your plan stand out.

Yours,

Li Hua

Possible version 3: 两个方案建议（校园生活和数字学习），分别有各自的理由

Dear Jim,

Knowing your interest in the Smart Campus Project at your school, I'm delighted to share my advice.

You may focus on improving students' life experience. For example, you can suggest building a digital smart canteen system or equipping the gym with AI devices. These systems will enable students to enjoy more personalized services, making their school life more convenient and enjoyable.

When it comes to students' learning, integrating virtual reality courses into the curriculum can be a great way to transform their learning experience. Also, a digital library will definitely provide students with access to more diverse and interactive materials, which will make learning more immersive and tailored to individual needs.

I wish you all the best in your efforts!

Yours,

Li Hua
